LAKE VERA: There are 3 clusters of submerged rocks as noted on the diagram. The "Turtle Rock" cluster is usually visible towards the end of the summer, but is a boating hazard in early summer as the rocks are just barely below the surface; the other two clusters are located in "Out of Bounds" boating areas. One is located in front of the dam, the other in the camp swim area to the right of the dam. **THERE IS NO DIVING!** This includes from the rafts or boats.

I will instruct my guests and comply with all aspects of the Lake Vera Waterfront rules. A lifeguard, parent or responsible adult will supervise anyone swimming or boating who is under 18. All boaters under 18 will wear a life jacket as provided by Camp Watanda.
